

ENVIRONMENTAL POLICY STATEMENT

Mission Statement

Trans Haul believes it has an important duty to ensure good environmental performance in all its business operations and to provide the necessary organisation, commitment, and training to fulfil this obligation. Trans Haul also has a duty to protect the environment from any outbreak or contamination through current or potential viral epidemic or pandemic situations.

Future Net Zero (carbon emissions) - The scale of transformation required through decarbonisation is unprecedented. We need to make fundamental changes, not only in how and why we travel, but also in the sectors that support zero emission mobility and storage – from energy generation and transmission through to vehicle movement and warehousing storage solutions.

Environmental impacts

Being a comprehensive warehousing and transport company in the 3PL logistics sector, we are fully committed to the environment and are aware of the impact we have as a Transport & Storage business.

- We are committed to improving our practices in order to minimise the impact of our freight on the environment
- We optimise our routes through our state-of-the-art tracking system to reduce noise pollution and diesel consumption.
- We also reduce emissions by our vehicle fleet maintenance programme and the vehicles that we purchase
- We regularly maintain and service all company vehicles to ensure their efficiency and minimise GHG emissions
- We educate our staff on what each individual can do to help the environment. We keep our usage of non-organic cleaning material to a minimum
- We will use, where viable, recyclable products and encourage the recycling of materials and waste
- We will always listen to Government, whether local or national on their views on what we can do to reduce our carbon footprint
- We ensure all vehicles are compliant with Low Emission requirement
- We take account of environmental considerations such as developments in fuel and vehicle technology, when acquiring new company vehicles
- We consistently review our warehouse and office locations for environmental improvements and opportunities

Responsibility

The senior management firmly believes in, and is committed to monitoring and improving environmental performance, pollution prevention and environmental protection.

Policy Aims

These aims will be achieved through:

- Incorporating environmental responsibility into all business operations by planning environmental protection, reviewing, and developing policy, by setting targets and reviewing and auditing performance.
- Utilising the best available techniques not entailing excessive costs to comply with the requirements of existing and future legislation and encouraging those working on our site to meet the same standards.
- Observing a systematic waste minimisation programme to achieve objectives and targets to reduce waste, avoiding the use of terminal waste treatment and dealing with it as far as possible at source.

ENVIRONMENTAL POLICY STATEMENT

- Pursuing continuous improvement in environmental performance, where reasonably practicable, by setting objectives and targets, especially in addressing the areas of resource use, by reducing energy and water consumption, increasing reuse, and recycling and improving solid and liquid waste management methods.
- Being committed to maintaining effective communication systems on environmental matters through training, internal auditing, and improved awareness.
- Trans Haul will promote its objectives and will respond positively to enquiries and suggestions from both inside and outside the company. All employees have responsibilities for policy implementation by participating and contributing to its success through their actions and suggestions.
